

Services Provided

We focus on weaning, stabilizing, and rehabilitating the patient who would otherwise receive traditional hospital care.

www.foxsubacute.com

Ventilator patients: **Weaning** or Chronic

- Medically stable patients requiring ventilation; each patient assessed for an individual weaning care plan
- Patients requiring full or nocturnal ventilatory support-that have a prognosis for weaning or have been deemed unweanable
- Long or short term placement
- Facility wide oxygen and vacuum suction
- Chest tube to water seal only

**We do not take patients requiring non-invasive ventilation

Tube Feedings/Diet:

- Continuous or Bolus enteral feedings via peg, G-tube or J-tube
- NG tube/Dobhoff consideration on a case by case basis
- Traditional or elemental tube feeding formulas
- Capable of providing all diets by mouth
- Combination feedings – TPN while advancing tube feedings or 3 meals a day with a nocturnal tube feeding for nutritional support

IV's:

- All IV antibiotics provided – carve out may apply for third generation drugs
*Drug levels monitored
- IV Fluids when appropriate for hydration
- IV push drugs we can administer: Lasix, Morphine, Ativan, Bumex, Digoxin, Solu-medrol, Valium, D50, Toradol, Dilaudid, Demerol, Phenergan, Zofran
- TPN-short term preferred
- Other IV's: Venofer, Pepcid, Reglan
- Most IV access acceptable- peripheral, midline, picc, central lines, porta cath

**Milrinone/Primacor drip or Dobutamin/Dopamine can be given if not being titrated because we do not do cardiac monitoring – Carve out would apply for this drug as well.

Unable to administer Chemotherapy or Blood products
